

ECOLOGICAL MATERIALS

RECYCLED PLASTIC

RECYCLED PLASTIC

Introduction

- Plastic is one of the most widely used products in today's society. By being discarded by individuals and companies, it can go through a recycling process that guarantees its reutilization in the production of recycled plastic. Recycled plastic has almost all the features of regular plastic.

Importance

- The plastic recycling is extremely important for the environment. When we recycle plastic or buy recycled plastic we are contributing to the environment, preventing this material from going to landfills or from being left in nature, polluting rivers, lakes, soil and forests. We can not forget also that the plastic recycling, in addition to reducing pollution, also creates jobs for thousands of people worldwide.

Profils Circulaires

Profils Quadrangulaires

Profils rectangulaires

ADVANTAGES

Combining low installation costs, with the absence of maintenance, the materials of composite plastic 100% recycled and the products made from it provide:

- Resistance to corrosion and vandalism. It does not rot and it is unalterable.
- Lighter than steel, approx. 1/3 of its weight.
- Insulating
- Anti-slip
- Resistant to parasites and fungi.
- Resistant to shock, abrasion and breakage.
- Long life
- Can be sawed, planed, machined, nailed, screwed and painted.
